“ Kay has been a valuable member of the Student Support Services and Gadsden State Community College Family for ten years and there are not adequate words to express the loss we feel. She had such an important impact on students as a teacher, counselor and friend to so many over the years. She was always available to help and most of all just listen to students who were struggling with family or school issues. This week has been a time of sadness and reflection on how many lives she touched and the students who cherished her friendship, guidance and understanding through their journey. Our office this week has been a place of sharing so many wonderful memories of Mrs Kay for our staff and students, she will be missed and never forgotten. She was loved by all of us and we want to express our sympathy to her husband and family.
